Dear Sir/Mam,

I am writing this letter to express my interest for the position of Summer Software Engineer Intern.

I am Adhithyakrishna, a graduate student pursuing my master's degree in computer science at SUNY - University at Buffalo. I have 3.5 years of prior work experience as a software development engineer in an Ecommerce SaaS company.

I am well versed in Java. I have hands-on experience in building Rest API using Spring Boot and Hibernate and I have very good knowledge of MySQL. I have worked on projects such as statistical report generation from AWS cloud watch and user authentication using Spring framework. I was also responsible for designing and developing search micro-services to search user information from around 2 million records. I enjoy working on challenging projects that will help me expand my knowledge and skill set. I have good interpersonal skills and I work very well in team environments.

I am looking forward to being an intern at Smartsheet, which will allow me to work along with brilliant minds and contribute my best to the company.

Please find my resume attached as a part of the application, and I can be reached by my mobile phone +1 716-275-9093 or through my mail id adhithya.developer@gmail.com.

Thank you for your time and consideration in reviewing my application. I am looking forward to speaking with you about this opportunity

Sincerely,
Adhithyakrishna Kovai Srinivasan
